

MOJO BAR BARRIER STRAIGHT, PLASTIC/STAINLESS STEEL

The MOJO Bar Barrier is designed for quick and stable event catering areas, featuring a durable plastic structure with a stainless steel counter.

SKU: 1002161 | **Categories:** [Concert Barricades](#)

PRODUCT DESCRIPTION

The MOJO Bar Barrier combines a flexible, lightweight plastic structure with a durable stainless steel counter, making it the perfect solution for setting up catering areas at events. Designed with the same base as all other MOJO barriers, this bar barrier is stabilized when guests stand on the floorplate, increasing its strength with their own weight.

The stainless steel serving counter is easy to clean and hygienic, making it ideal for serving food and drinks at high-traffic events. The bar barrier's flexible design makes it suitable for public catering areas with light to medium crowd pressure, ensuring both stability and portability.

The MOJO Bar Barrier is also portable and easy to transport. It can be flat-packed and stacked, allowing for efficient storage and logistics. Additionally, corner elements are available to create enclosed areas, providing flexibility for different event setups.
