

MOJO BARRIER FLEX CORNER, SILVER

The MOJO Flex Corner Barrier in aluminum offers adjustable angles from -90° to $+90^{\circ}$, perfect for flexible event configurations.

SKU: 1001998 | **Categories:** [Concert Barricades](#), [Crowd Control](#)

PRODUCT DESCRIPTION

The **MOJO Barrier Flex Corner** is engineered for ultimate flexibility in shaping barricade lines at concerts, festivals, and large-scale events. With adjustable angles from -90° to $+90^{\circ}$, it enables smooth transitions around FOH positions, camera platforms, and other complex event areas.

The Flex Corner integrates seamlessly with other MOJO barriers, providing aesthetic and functional flexibility to match your event's specific needs. The hinged wings allow precise adjustments, and the absence of a floor plate makes it adaptable to uneven surfaces, making it ideal for challenging spaces.

For optimal stability, the Flex Corner requires support from two adjacent MOJO Straight Barriers. Once connected on both sides, it ensures secure crowd control even in high-pressure environments. Built to handle intense crowd conditions, the Flex Corner connects easily to other MOJO barricades through a standardized interlocking system, creating a continuous and secure barricade line.

TECHNICAL INFORMATION

Weight	44.09 lbs
Dimensions	0.39 × 46.46 × 1.97 in
Color	Silver
Angle Range	Adjustable from -90° to $+90^{\circ}$
Material	Silver, aluminum finish, no floorplate
Connection	Standard interlocking system, compatible with other MOJO barriers
