

MOJO BARRIER MEGA EXIT GATE

The MOJO Barrier Mega Exit Gate offers secure, large-scale exit and entry points in crowd control setups, suitable for both pedestrian and vehicle access at high-traffic events.

SKU: 1002541 | **Categories:** [Concert Barricades](#)

PRODUCT DESCRIPTION

The MOJO Mega Exit Gate is an essential component for event safety and logistics, providing a wide 9.84ft opening for efficient entry and exit of pedestrians, service vehicles, or emergency response units. Built from durable aluminum with black steel floorplates, this double-wing gate integrates seamlessly into a MOJO barrier line for a secure, controlled access point.

The gate doors are designed to open away from the crowd, ensuring safe and easy access. Its innovative vertical bolt locking system allows for quick release via a foot lever, offering both security and speed when needed. With sloped floorplates, vehicles can easily pass through without the need for additional ramps, making this gate ideal for festivals, concerts, or events where emergency vehicle access is critical.

Whether you're managing large crowds or ensuring emergency preparedness, the MOJO Mega Exit Gate is designed to handle the pressures of large-scale events while maintaining the highest standards of safety.
