

MOJO BARRIER VARIO CORNER, BLACK

The MOJO Vario Corner Barrier in black offers fully adjustable angles from -60° to $+60^{\circ}$, ideal for creating custom barricade layouts at concerts and events.

SKU: 1002016 | **Categories:** [Concert Barricades](#), [Crowd Control](#)

PRODUCT DESCRIPTION

The MOJO Vario Corner Barrier is a versatile component in any crowd control system, engineered to provide maximum flexibility for concerts, festivals, and large-scale events. Featuring a robust upright and a durable floor plate, this barrier section allows for precise angle adjustments from -60° to +60°, making it ideal for custom layouts.

The Vario Corner's central hinge and partial floor plate enable precise configuration to accommodate complex crowd management setups, such as round stages, catwalks, or secondary barricade lines. The floor plate provides a stable foundation, while the set angle fixation and single-bolt connection ensure seamless integration with other MOJO barriers. This design allows for easy assembly without compromising strength or stability.

The Vario Corner's partial floor plate and brace system guarantee reliability, even under heavy crowd pressure, while the sloping floor plate ensures barrier-free access. The grooved surface also prevents slips, providing a safe environment for attendees and event staff.

TECHNICAL INFORMATION

Weight	74.96 lbs
Dimensions	39.37 × 46.46 × 50.39 in
Color	Black
Angle Range	Adjustable from -60° to +60°
Feet Type	Divided base plate for stability and adjustable angle support
Material	Welded aluminum frame, black finish with silver floorplate
Compatibility	Fully compatible with other MOJO barricades for flexible setups
