

LIGHTWEIGHT CROWD CONTROL BARRIER WITH INTEGRATED FEET, 33.5IN HEIGHT

Compact, lightweight steel barriers with integrated feet for reliable and fast crowd control.

SKU: 1000030 | **Categories:** [Crowd Control Barriers](#)

PRODUCT DESCRIPTION

Our lightweight steel crowd control barriers with integrated feet are perfect for directing non-critical audiences and marking off areas with lighter crowd density. Ideal for sporting events like cycling races, marathons, and city runs, they're also great for public catering areas, securing merchandise stands, or reserving VIP parking spaces.

Thanks to their lightweight construction and hook-and-eyelet connection, these barriers are quick to set up and take down, even over long distances. The integrated feet offer stability on various surfaces, making them both portable and secure. Available in pre-packaged sets of 25, 50, or 75, they provide an efficient solution for event organizers.
