

LIGHTWEIGHT CROWD CONTROL BARRIER WITH INTEGRATED FEET, 37IN HEIGHT

Lightweight steel barriers with integrated feet, perfect for managing non-critical audiences.

SKU: 1001054 | **Categories:** [Crowd Control Barriers](#)

PRODUCT DESCRIPTION

Our lightweight steel crowd control barriers with integrated feet and a 37-inch height are designed to guide non-critical audiences and manage areas with lighter foot traffic. Ideal for sporting events like cycling races, marathons, and city runs, they are also excellent for public catering areas, securing merchandise stands, or reserving VIP parking spaces.

Thanks to their low weight and hook-and-eyelet connection, these barriers are quick to set up and take down, even over long distances. The integrated feet provide stability on various surfaces while maintaining portability. Available in pre-packaged sets of 25, 50, or 75 pieces, they offer an efficient solution for event organizers looking for fast, flexible crowd control for lighter applications.
