

## MOJO GATEKEEPER TURNSTILE GATE

The MOJO Gatekeeper Turnstile Gate provides a secure, automated system for managing entry and exit at events, venues, and restricted areas.

**SKU:** N/A | **Categories:** [Crowd Management Entry Solutions](#)

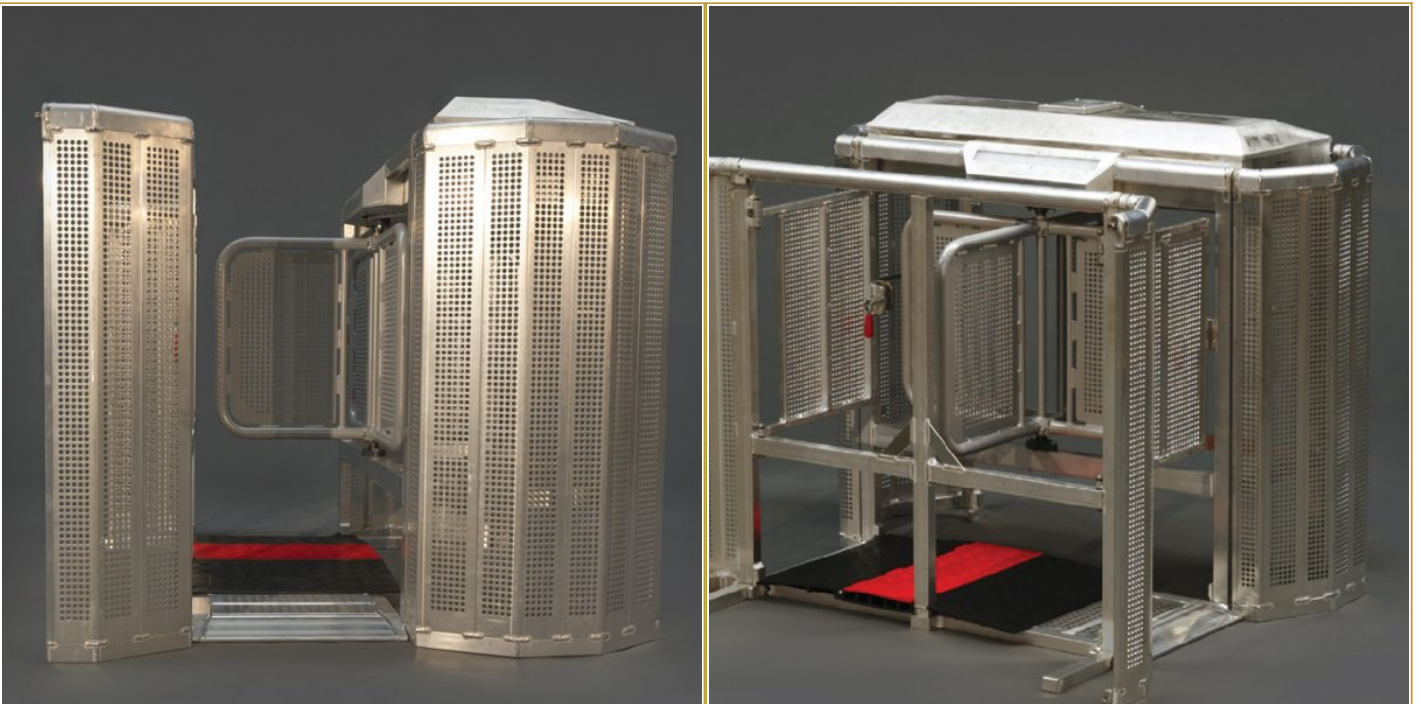

## PRODUCT DESCRIPTION

The MOJO Gatekeeper Turnstile Gate is a sophisticated crowd control solution designed to manage all aspects of entry and exit for events, venues, and restricted areas such as VIP sections or staff-only zones. This intelligent turnstile gate system ensures secure, real-time monitoring of crowd flow and can be used as a standalone solution or integrated with your event's ticketing system for automated access management.

The Gatekeeper Turnstile Gate connects directly to a central computer system, providing accurate, real-time capacity data and controlling attendee flow. Its quick installation and compatibility with all major ticket scanning technologies—from barcodes to RFID and QR codes—make it a versatile and powerful tool for event security and crowd management.

Ideal for large-scale events, the MOJO Gatekeeper Turnstile Gate helps event organizers reduce ticket fraud, improve attendee flow, and ensure overall event security by automating the entry process and providing real-time insights.

PLACE WRISTBAND HERE

A screenshot of a software interface for gate management. The interface shows a table of areas and their current counts. It also displays various settings and gate status indicators. Below the screenshot is a close-up photograph of a hand placing a wristband on a screen that says "PLACE WRISTBAND HERE".
