

LOW TEMPORARY FENCE PANEL, 11.5FT X 3.6FT

Low-height temporary fence panel (11.5ft x 3.6ft), ideal for creating secure and controlled spaces at events while maintaining visibility.

SKU: 1001485 | **Categories:** [Temporary Fencing](#)

PRODUCT DESCRIPTION

The Low Temporary Fence Panel offers an effective solution for event demarcation and crowd control, especially in areas where visibility is key. With dimensions of 11.5ft wide and 3.6ft high, this panel is perfect for temporary setups that require a defined boundary but don't need the height of traditional fencing. It is ideal for marking VIP zones, parking areas, walkways, or controlled spaces at festivals and corporate events.

This panel is constructed from durable galvanized steel, designed to withstand outdoor conditions. The low height allows for easy communication across the barrier while maintaining a clear separation for crowd control or restricted access.

The panel is lightweight, easy to install, and well-suited for any event where quick setup and efficient use of space are critical.
