

TERRATRAK PLUS HEAVY-DUTY FLOORING, GREY

Terratrak Plus grey flooring delivers durable turf protection, supporting vehicles and machinery with a sleek, opaque finish.

SKU: 1004337 | **Categories:** [Event Flooring & Ground Protection](#), [Heavy Duty Drivable Flooring](#)

PRODUCT DESCRIPTION

Terratrak Plus Heavy-Duty Flooring is a high-performance turf protection system, engineered to handle extreme loads while maintaining the health of the turf below. Made from high-density polyethylene (HDPE), this flooring can support loads of up to 160 tons, making it a trusted choice among stadium operators and greenkeepers worldwide.

Available in **translucent** and **grey** variants, each panel serves unique purposes. The **translucent option** allows light penetration, enabling the turf to photosynthesize even during extended coverage, reducing the need for post-event turf restoration. The **grey variant** offers the same level of heavy-duty protection with a sleek, opaque finish suited for less light-sensitive areas.

The panels connect securely via a circumferential lock system, forming a stable, continuous surface capable of supporting trucks, forklifts, aerial work platforms, and mobile cranes. Patented transition elements provide seamless, trip-free transitions to other types of flooring, such as Remopla or Supa-Trac, making Terratrak Plus an ideal solution for large-scale event setups and construction sites.

TECHNICAL INFORMATIONS

Weight	101.41 lbs
Dimensions	94.49 × 1.57 × 47.24 in
Color	Grey
Material	High-Density Polyethylene (HDPE)
Accessories	Loading ramps, patented transition elements
