

SUPA-TRAC[®] LAWN PROTECTION FLOORING

Supa-Trac panels provide durable protection for turf and sensitive surfaces, designed for events requiring medium-load capacity and quick installation.

SKU: 1002391 | **Categories:** [Event Flooring & Ground Protection](#), [Turf and Surface Protection](#)

PRODUCT DESCRIPTION

Supa-Trac Lawn Protection Flooring offers a versatile solution to protect stadium turf, grass, and other delicate surfaces from damage caused by medium-heavy loads. This modular flooring system uses a patented click mechanism, allowing for fast assembly and dismantling without the need for specialized tools.

The Supa-Trac system ensures the protection of event spaces, supporting safe passage for both pedestrians and medium-weight vehicles. Its unique air circulation and drainage design allows it to cover turf for extended periods while preventing moisture build-up, making it ideal for temporary parking, walkways, or public areas at large events.

Constructed from polypropylene copolymer, this lightweight yet durable flooring system is easy to transport and handle. Whether for concerts, festivals, or sporting events, Supa-Trac Lawn Protection Flooring delivers dependable surface protection for your venue.
