

MOBILE LIGHTING TOWER, 27.9FT, 4X HQI 1000W

The Mobile Lighting Tower provides powerful 360,000 lumens of light coverage across up to 53,820 sq ft, making it ideal for large outdoor events and construction sites.

SKU: 1001885 | **Categories:** [Mobile Lighting Towers](#)

PRODUCT DESCRIPTION

This 27.9ft (8.5 meters) tall Mobile Lighting Tower is designed for high-performance lighting in large outdoor spaces, including events and festivals. Equipped with four HQI 1000W metal halide lamps, the tower generates a bright 360,000 lumens, offering up to 53,820 square feet (5000 sqm) of clear, even illumination.

Built for outdoor use, the tower is easy to transport and set up thanks to its forklift pockets and anchor points, allowing for effortless positioning with a truck or forklift. The tower's four adjustable spindle feet make it adaptable to uneven terrain, ensuring stable installation in any environment.

The soundproof design ensures quiet operation at only 65 dB, making it suitable for events where minimal noise disruption is crucial. The eco-friendly design includes a 170-hour fuel capacity, while a built-in fuel collection system ensures environmental protection in case of leaks. Additionally, a wind sensor triggers automatic mast retraction when wind speeds reach 50mph (80 km/h), adding an extra layer of safety.

For flexible power options, the lighting tower can also be operated via a 32A wired power supply as needed.

TECHNICAL INFORMATIONS

Weight	3637 lbs
Dimensions	98.4 × 47.2 × 47.2 in
Illumination Area	Up to 53,820 sq ft
Lamps	4x HQI 1000W metal halide
Light Output	360,000 lumens
Noise Level	65 dB
Wind Sensor	Retracts mast at 50mph
Fuel Capacity	Runs up to 170 hours on one tank
Power Supply	Compatible with 32A wired power source
